## PROJECTS

### Gym Management System (Fitness Headquater) ( Django,Python,Sqllite,Css,HTML,Tailwind Css,Bootstrap)

- Completely build from scratch by me.
- features :User Registration,Membership Management,Offer Listing,Admin Page, Reset Password etc.
- The system enables users to create accounts, explore available offers and memberships, apply for careers within the gym, and manage their profiles. Admin functionalities include overseeing career applications, managing memberships and offers, and handling user inquiries via the contact us feature.
- future:Payment Integration.

### Recipe Plateform( Django,Python,MySql,Css,HTML,)

- Completely build from scratch my me.
- It is a platform where anyone can easily access a variety of delicious recipes. Users can browse through existing recipes or, if they're registered, they can even contribute their own culinary creations!

### Multi User Todo App( Django,Python,Sqllite,Css,HTML)

- Developed a multi-user todo app using Django with secure user authentication and authorization.
- Implemented task management features, including create/edit/delete/mark complete.

### Weather App(Django,Python,Api,Html,Css,github)

- Developed a weather forecasting web app to enhance my learning through integration of third party api's.

---
